

CM80i AUTOPILOT.

CM80i INTELLIGENCE

– WITHOUT RUDDER FEEDBACK

The CM80i breaks new ground in intelligent autopilots. The new features of this system make it both easier to install and very easy to use. The intelligence built into the system means that there is no need for a rudder transducer, and the system adjusts itself to suit the boat speed and sea state. The CM80i's compact design fits easily into almost any small boat dash.
